

Grant Thornton

An instinct for growth™

Restructuring

Creating bespoke solutions for growth-orientated businesses

At Grant Thornton, our core purpose is to create or preserve value for shareholders. To achieve this, we supply a wide range of services to underperforming businesses and their stakeholders.

Our team of specialists are committed to realising value for shareholders, in a way that recognises the interests of all stakeholders. Driven by a determination to find and implement optimum solutions for clients, which is delivered through the prompt commitment of dedicated and experienced resource using a cost effective and efficient approach.

Operational and Financial Restructuring

Underperforming companies often require advice and support with identifying appropriate solutions for financial and/or operational restructuring to create a stable platform for business turnaround. Our work focuses on understanding the position of a business, identifying the appropriate financing structure and ascertaining how the restructure could be delivered. We have significant experience in the evaluation of all sizes of businesses, ranging from SMEs through to complex multi-jurisdiction based businesses.

Crisis Stabilisation and Turnaround

Where underperformance leads to a breach of banking facilities or covenants; pressure from creditors or threat of withdrawal of credit lines, the business and its stakeholders need to appoint independent advisors with proven experience. In the early stages of turnaround, the right support is necessary to create financial stability, assess cash flow and identify other means of improving short-term liquidity. In such cases, Grant Thornton provide a full suite of services which include the management and implementation of full crisis stabilisation and turnaround programs.

Liquidation, Insolvency and Corporate Simplification

When looking to liquidate a company or simply obtain advice, you need it from a firm who can draw upon years of technical and professional experience. At Grant Thornton, we leverage our teams wide experience to assess our clients position before providing credible and practical solutions. Often such advice will include a formal liquidation process, in which case we have the capability to undertake liquidations and insolvency engagements ranging from individual companies through to large, complex group structures with cross-border presence. We are providers of liquidation services in the DIFC and wider UAE market.

We are driven by a determination to find and implement optimum solutions for our clients.

Guy Wall
Director
