An instinct for growth™

# Technology Advisory

## Leveraging smart tech to drive innovation

Powerful forces such as globalisation and rapid technological change are disrupting traditional business models. By working with Grant Thornton, you'll better understand these forces and their impact. We can formulate solutions to keep you ahead of disruptive change and support your innovation ambition by exploiting technology.

### Data analytics and dashboards

The Grant Thornton team will help you to develop a strong data foundation, analyse that data and harness the power of the information you hold to improve your business performance and monetise data opportunities.

Our services include:

- Data visualisation / dashboard design and development
- Data quality and governance
- Evaluation of BI tools and programme management

### Digital transformation

We aim to support organisations to fully leverage the possibilities and opportunities of new technologies and their impact in a more innovative way.

Our services will help you to conduct some of the intense digital transformation services, which include:

- Digital health check, strategy and roadmap
- Digital vendor evaluation and programme management
- Robotic process automation

### Strategy and governance

Grant Thornton supports organisations to develop, implement and review IT strategies in alignment with business strategies, put in place effective command-and-control structures, continuously monitor performance and implement an optimised architecture design.

Our services include:

- IT strategy and roadmap
- IT policy and process, service and performance management
- Business process re-engineering, system / vendor selection and programme management
- VAT – system impact assessment and implementation management

### Cyber security & IT risk management

We help you understand your current exposure to cyber security risk and support you to develop an effective security strategy. We help you to respond rapidly and forensically in the event of a breach.

Our services include:

- Cyber security assessment, governance and strategy
- Vulnerability assessment & penetration testing
- NESAs and ISO 27001 consultancy
- IT audit / health check
- ERP pre / post implementation review

## Unlocking your technology potential

### George Stoyanov
