

Fadwa Sahly, CFA
Director, Risk/Regulation Transformation

fadwa.sahly@ae.gt.com

Fadwa has over 16 years of Banking and Central Banking experience internationally, starting her career with Deutsche Bank in Toronto. She has been in Dubai for the last two years.

She possesses extensive experience in risk assessment, forecast building and predictive analysis, crisis management, recovery framework and operational resilience.

Fadwa has advised and led key engagements with major banks, tailoring solutions in areas of capital adequacy and optimization, regulatory compliance, governance, limit framework, risk appetite, ICAAP / ILAAP and sensitivity analysis.

As head of stress testing at the Central Bank of Ireland, Fadwa was responsible for prescribing,

challenging and delivering the EU-wide stress test of Irish banks, following the Global Financial Crisis. She led the review and assessment of methodologies and loan loss forecast results from banks and capital implications, leading in bilateral engagements.

Fadwa was instrumental in the design and delivery of the framework used to drive the recapitalization effort of the banking sector in Bermuda. She designed the off-site review process and monitoring of the sector, including risk quantification, performance analysis and forward looking performance assessments.

Fadwa is passionate about knowledge transfer, education and learning & development. She feels privileged to elevate the risk and regulatory knowledge base of her clients and the region.
